Specialist Energy Group Plc
(the “Group” or the “Company”)

Specialist Energy Group Receives UK Trade & Investment Export Award

The Directors of Specialist Energy Group Plc (AIM: SEGR.L), the niche engineering and manufacturing group, are pleased to announce that the Company has been awarded the 2010 London Exporter of the Year Award for Advanced Engineering & Manufacturing.

The London Export Awards are organised by UK Trade & Investment, the UK government organisation that helps UK-based companies succeed in the global economy, and are backed by the Mayor of London, Barclays Bank Plc and the *London Evening Standard*. The awards highlight the achievements of London’s internationally-operating businesses and the contributions made to the economy of London. Specialist Energy Group was one of over 100 businesses competing for this year’s awards.

Specialist Energy Group’s main operating business is Hayward Tyler Group Limited (“Hayward Tyler”). Hayward Tyler develops, manufactures, supplies and services high-end pumps and motors for use in both the oil & gas industry and power generation sectors – conventional, nuclear and renewable.

Recently Hayward Tyler developed the world’s largest deep subsea motor for use in the North Sea and has installed equipment in over 70% of the installed nuclear power stations in North America. Currently 34% of Hayward Tyler’s sales are to the US, 28% to Europe and 20% to China – its forward order book recently stood at over £35 million.

Ewan Lloyd-Baker, CEO of Specialist Energy Group, commented:

“It is certainly a great honour to be recognised for our exporting efforts in this way and reflects the significant emphasis we have placed on wanting to compete – and win – in international markets. It also bears testimony to the strength in Hayward Tyler of our product design and manufacturing processes, our pumps and motor products being as relevant to the conventional energy industry as to the nuclear and renewable energy markets. We look forward to further developing our business’s export position in Asia, the Americas and closer to home.”

The awards ceremony for the London Export Awards took place on 10 February 2010 in central London at which Lord Davies of Abersoch awarded the prizes.
